**Note:**

This table uses data from URS/DIG Table 2a, Table 2b and from the US Census Bureau.

All denominators use US Census data from 2003.

US totals are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

2a Gender: None

Age: None

Race: None

Overall: A phased-in statewide roll-out of a new data system between the recording of FY'03 data and FY'04 resulted in the 2003 recorded results being lower than a typical year. With a fully implemented system, FY'04 data and forward will be fully comparable. Using an algorithm to estimate the FY'03 actual Race/Ethnicity Not Available (Access Domain: Table 1) would indicate a number twice that of the recorded (409 rather than 210). That would result in a change of 462 rather than 661 (a 128% increase rather than 315% from FY'03 to FY'04).

**Note:**

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS/DIG Table 3b, State Total Served During Year is calculated using data from URS/DIG Tables 3a and 3b.

This table uses data from URS/DIG Tables 3a, 3b, and 6.

Overall A phased-in statewide roll-out of a new data system between the recording of FY'03 data and FY'04 resulted in the 2003 recorded results being lower than a typical year. With a fully implemented system, FY'04 data and forward will be fully comparable. Using an algorithm to estimate the FY'03 actual Gender Not Available (Access Domain: Table 2) would indicate a number 3.5 times the recorded (218 rather than 63) resulting in a change of 464 rather than 619 (a 121% increase rather than 983%) from FY'03 to FY'04.

3b Gender None

Community Community Programs: Total Served (NA=320), Admissions (NA=3091).

Overall With a recent statewide roll-out of a new data system during the time in which this data were analyzed, the data for duplicated admissions to community programs during FY'04 have been compromised, thereby a misrepresentation of the actual, but in fact the best data available at the time.
